

SAYAN DEBNATH

PHP DEVELOPER

OBJECTIVE

Seeking a challenging and dynamic role as a PHP Developer with a prestigious IT company, where I can leverage my strong foundation in PHP programming, enthusiasm for web development, and a commitment to delivering high-quality code. As a passionate learner, I am eager to contribute to innovative projects, collaborate with experienced professionals, and continue honing my skills in a fast-paced and supportive environment.

PROJECTS

Online Shopping Cart (PHP, HTML, CSS, JavaScript, MySQL)

Designed, developed, and deployed a fully functional online shopping store using PHP, HTML, CSS, JavaScript, and MySQL. The project aimed to provide a user-friendly platform for customers to browse, select, and purchase clothing items, with seamless PayPal integration for secure transactions. Additionally, the system included an admin section with user registration, login, and image management features.

Interior Home Paints Website (live) URL : www.rongberonginterior.com

Conceptualized, designed, and developed a live website specializing in interior home paints, using PHP, HTML, CSS, JavaScript, and MySQL. This project aimed to serve as a platform for both potential clients and administrators, allowing clients to view current projects, get in touch with the company, and administrators to manage project images seamlessly.

Online Cab Booking Website (PHP, HTML, CSS, JavaScript, MySQL)

Designed and developed a dynamic online cab booking website to provide a convenient platform for users to register, log in, choose, and book cabs for specific times while allowing administrators to update website content and monitor client activity through an admin panel.

PROJECTS

Website improve voting system to mitigate fake voting and security issues

During my academic journey, I had the opportunity to lead a project aimed at revolutionizing the traditional voting system by introducing modern technology and enhanced security measures. This project was developed using PHP, HTML, CSS, and integrated fingerprint verification for a more secure and reliable voting process.

TRAINING

I have done a PHP course from IPEG Solution - freshersindia
